

Provides the highest ever light output 450 lumens
On-board 5 chips new type high efficiency LEDs

Color temperature 6500K

Wide-angle round chamfered reflector distributes spreading LED light.
High output LEDs positioned on the side produce light in all directions.

Built-in constant current circuit maintains certain LED light output.
Delivers high lumen and constant light output, incorporating thermal protection feature and using selected high thermal conductive heat release materials.

Color temperature 6500K is great with IPF's LED headlamp & fog lamp bulbs.

Product features

High-intensity & efficiency
"On-board 5 chips new type LEDs"
"Finish cutting Aluminum housing"
"Round chamfered reflector used"

- ① Built-in constant current circuit
- ② Noise-reduction circuit
- ③ Thermal protection feature
- ④ Highly heat-conductive thermal grease filled core

9 TIMES BRIGHTER
than factory bulb

Part No.	Spec	Lumens	Color temperature
701W	LED T10 12V 2.7W	450lm	6500K

■ Package size: H.115mm x W.65mm x D.24mm
