

CARGO EXTENSION

IPF's all-new cargo extension kit provides extra cargo space behind your rear seats.

Designed exclusively for JIMNY JB74

When the brake is applied, it can prevent loads from slipping off.

Easy installation with no modifications, by simply inserting it into the installation holes.

This product is adjustable (in the same way as a head restraint), and you can expand your cargo space by up to 180 mm from when not in use. Specially designed holding holes allow removed head restraint to be neatly fitted.

Part No.	Product name	Type of vehicle
EXJ-01	EXP Series Cargo Extension Kit for JIMNY (JB74)	SUZUKI JIMNY (JB74) 2018 MY

*DO NOT allow passengers to use rear seats after this product has been attached. This product does not conform to (UN/ECE) - Uniform provisions concerning the approval of vehicles with regard to their interior fittings (Reg. No. 21).
