

MULTI USE BAR

日本製

MADE IN JAPAN

Effective use of the ceiling and side space of the luggage space
Increases storage capacity

Ideal for organising JIMNY(JB64) • JIMNY SIERRA(JB74) luggage

Easy installation by simply attaching to the assist grip or nut hole. Can be used in combination with IPF Side Storage Panel(EXJ-02).

Multi Use Bars are now available to make effective use of the ceiling and side space in the luggage space, increasing storage capacity and expandability.

Layerable luggage when used with IPF Side Storage Panel(EXJ-02).

Expanded convenience
Eye nuts can also be fitted.

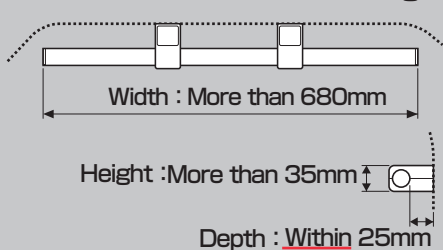

The Stay part can be fitted with commercially available Eye nuts (M6).
*Separate M6 size Eye nuts and bolts are required.

When it is used in combination with the Side Storage Panel (EXJ-02), which extends beyond the front, it enables deep loading. Luggage can be loaded in multiple stages, allowing for efficient carrying. *For JIMNY (JB64) and JIMNY SIERRA(JB74) models

Clearance Dimension Drawing

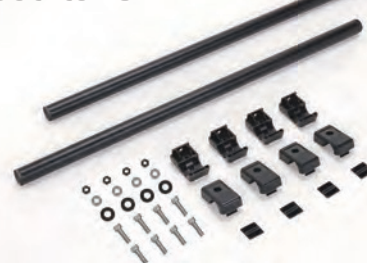

MUB-01

Two-pack

Set Items

■Due to its universal shape, it can be used with other vehicle models, provided that the mounting dimensions near the assist grip are compatible.
